1   Diploma and progress

Click the diploma dropdown to view all your diplomas and specializations. The green progress bar and red number badge will update to let you know how many credits you have earned and planned so far compared to the total number of credits you need.

2 Requirements

Use the requirements dropdown to view exactly how many credits are left in each required subject.

Tick the credit boxes so you can filter your course plan by the number of credits you've earned, planned, or have remaining.
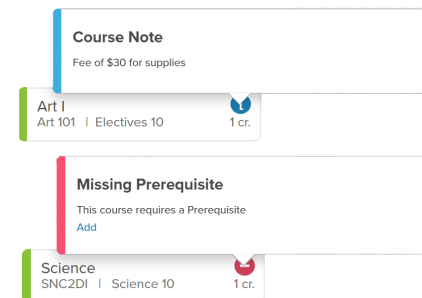

3 Grade columns

There's one column for each grade of high school, so you can plan ahead by picking out your future courses. Your diploma requirements, along with electives, and free periods are listed in each grade. Click a subject to see the available courses you can choose from.

Pro tip: Start in the later grades and work your way backwards! Xello will then help you figure out prerequisites and requirements for earlier grades.
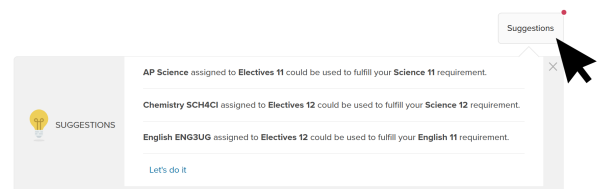

4 Alerts

You might see an alert on a course you've chosen. This can happen if there's a conflict, a missing prerequisite, or if there's additional information about the course. When you click the alert, it'll let you know what you need to do to clear it.

5 Suggestions

This handy **Suggestions** button will give you alternative courses that are more beneficial to your plan. A little red dot will indicate if there's a suggestion available.

6 Ready to submit

Once you're done with your plan, click **Ready to submit**. If there are any problems, you'll get a message with what you need to fix. After you submit your plan, you'll see a locked symbol at the top of the column. This means it's ready for your Administrator to approve.
