

Asking the important questions

Student instructions

- 1 In the Xello lesson titled **Exploring career factors** you identified a list of important questions you'd ask to make sure that any career you're exploring aligns with your top factors. Reopen this lesson in Xello to find this list of questions (under section 4), select and copy the whole list, and then navigate to one of your saved careers.
- 2 In the **My notes** card under **Explore this career** paste your list of questions to guide your investigation into 6 common factors that influence career decisions.
- 3 Work through your list of questions one by one, reviewing the career profile to help you determine how well the career ranks on each factor.
- 4 In the **Important factors** card under **Explore this career** record a star ranking for each factor based on your review of the career profile using your list of questions from the Xello lesson.
- 5 Rank the **Important factors** for 2 more saved careers. Make sure to copy and paste your list of questions into the **My notes** card for these careers as well.
- 6 **OPTIONAL:** After ranking the **Important factors** for 3 saved careers determine which career came out on top. In the **My notes** card of this career, add a written reflection for 3 of your important questions.
